SUMMARY

VR/XR Developer with 6+ years of professional experience and 15+ shipped VR and WebGL applications in Unity/C#. Expert in Unity XR, OpenXR, SteamVR and VIVE Wave, multi-user VR (Mirror), XR interaction design, performance optimization for headsets and reusable XR libraries. Industry experience in defense, rail, healthcare and entertainment.

TECHNICAL SKILLS

XR: Unity XR, OpenXR, SteamVR, VIVE Wave, WebGL, Multi-User VR (Mirror)

Languages: C#, C++, Python, JavaScript

Development: XR Interaction Design, Real-Time 3D, Performance Optimization, Reusable Libraries

Tools: Unity, Git, GitLab, SVN (TortoiseSVN), MongoDB, Autodesk Maya, Photoshop

PROFESSIONAL EXPERIENCE

Professional Development & Relocation to Japan · 2025 – Present

Osaka & Tokyo, Japan · Working Holiday Visa

- Completed a 3-month intensive Japanese language program in Tokyo to prepare for long-term integration into Japanese engineering teams.

3D Real-Time Developer — VR & System Simulation · 2023 – 2025

AKKODIS Engineering · Blagnac, France

- Developed VR training simulations for multiple classified projects linked to national security.
- Built and improved reusable VR asset and script libraries for internal projects.
- Contributed within a large multidisciplinary team to a high-fidelity VR train simulator for a Swiss railway manufacturer's new train prototype.

3D Real-Time Developer — VR Specialist · 2019 – 2023

dao&Co · Ramonville-Saint-Agne, France

- Shipped 15+ VR and WebGL serious games for clients across multiple sectors.
- Developed Kazaktul, an indie VR escape game (daoco.itch.io/kazaktul).
- Created VR script and asset libraries used across all internal and client projects, sustaining 60–90 FPS on target headsets.
- Implemented real-time multi-user VR synchronization (Mirror), supporting 8 concurrent users.

VR Developer Intern · 2018 (5 months)

Virtualis · Montpellier, France

- Developed a modern, accessible patient-management application in Unity.
- Designed a VR therapeutic solution based on human reflex exercises.

Software Developer Intern (part-time) · 2017 – 2018 (6 months)

A.M.R · Montpellier, France

- Developed a gamified social network with procedurally generated 3D trees with INRIA researchers (L-Py project).

EDUCATION

Master's Degree in Computer Science (IT Expert) · 2015 – 2020

EPITECH · Montpellier, France

- One-year international exchange program in South Korea.
- Co-designed a major graduation project within a team of 8+ engineers.

Baccalaureate in IT & Electronics, with honors · 2014 – 2015

Alphonse Benoit High School · France
